

JOIN GTP

The Gene Therapy Program (GTP) at the University of Pennsylvania is entering a new era of unprecedented opportunity with the great potential to reshape the face of medicine as we know it! We're currently hiring for entry-level through senior director positions.

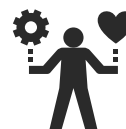

Mission-Driven

GTP strives to develop and commercialize transformative genetic-based therapeutics. These goals are driven by the unmet needs of patients with inherited genetic diseases.

The Vector Core

GTP's Vector Core has become an important technological resource for investigators interested in the use of viral-based vectors for gene transfer.

Total Rewards

Penn offers a competitive benefits package that includes excellent healthcare, tuition, retirement, and a wide variety of professional development opportunities.

Apply Today!

We currently have openings in GMP Manufacturing, Scientific Communications, Project Management, Human Resources, Translational Research, and more!

Visit [Penn's Careers Page](#), then search "Gene Therapy Program" for all GTP-specific openings. Questions about the application process should be directed to [GTP's Human Resources Team](#).
